

1. Have you or someone you have been in 6 feet contact with in the last 14 days has tested positive for Coronavirus? If yes, then we must reschedule.
2. Have you or someone you have been within six feet contact with in the past 14 days have been sick with any symptoms related to Coronavirus to include but not limited to: fever, chills, cough, shortness of breath, muscle pain, headache, sore throat, and or loss of taste and smell ? If yes, then we must reschedule.
3. We ask that patients be understanding to our new protocol. There could be more changes to ensure everyone's safety. We are following the CDC and the Department of Health policies.
4. If you arrive early, please wait in your car. Do not come to the office until your appointment time. If you come in early you will find a locked door with no staff available to answer that door.
5. You must wear a mask or face covering into the building. It must cover your nose and mouth completely. You will keep your mask on for the entire visit. It should not come off your face. If your lesion is on your face and is covered by your mask, we will tape your mask down to only expose the area we need to work on.
6. When it is your time for the appointment you can come upstairs to the office in suite 306. Open our office door and there will be staff to do your screening. If they are not in the waiting room, please sit a chair. Please do not knock on glass or doors. Someone will be with you as soon as they can.
7. Only the patient is allowed in the office. No family members. Family members can wait in the car. If a family member walks you to our office door, they will not be allowed in.
8. If your family member has a cell phone, please have the # available and we can call them when you are done so that they can pull up into the circle to get you.
9. Finally remember at all times you need to keep your mask on and that you will not be allowed in the office prior to your appointment time.
